The acceptance and /or use of this merchandise purchased from DragonFire by the customer hereby shall release DragonFire from any and all liability pertaining to the use of such merchandise.

- Read and understand these instructions before installing product.
- Do not drive with lights on as it may obscure your view - Lights are for decorative purposes only.
- Do not use product if there are any signs of damage.

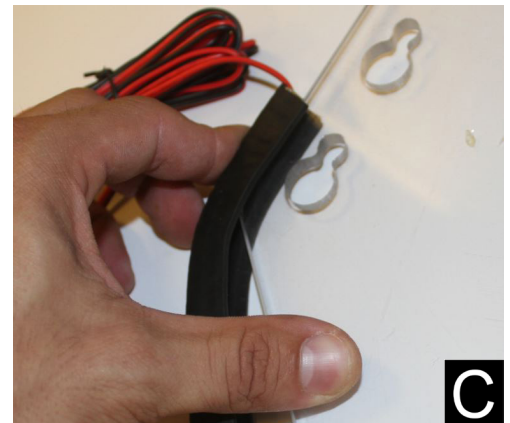

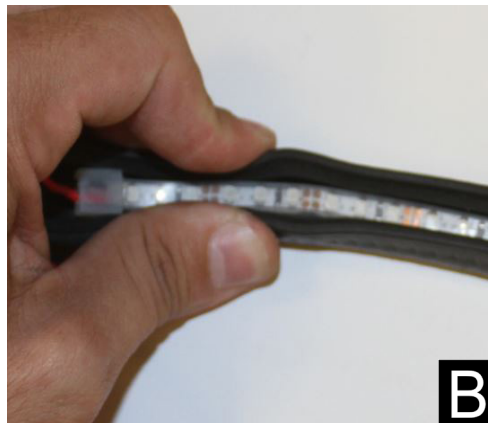

If the light is pre-installed in the weather strip, go to STEP 3. If not pre-installed, follow instructions below:

Step 1: Open the weather strip, and insert the Light Strip into the Weather Strip, pushing it down with your thumb (**Figure A**).

Note: Install light strip with lights facing up to maximize light output.

Step 2: Once the strip has been inserted, squeeze the weather strip to secure the light strip (**Figure B**).

Step 3: Install onto the Windshield, use plenty of force to ensure weather strip is secured onto windshield (**Figure C**).

Note: Figure D shows the Windshield Light properly installed.

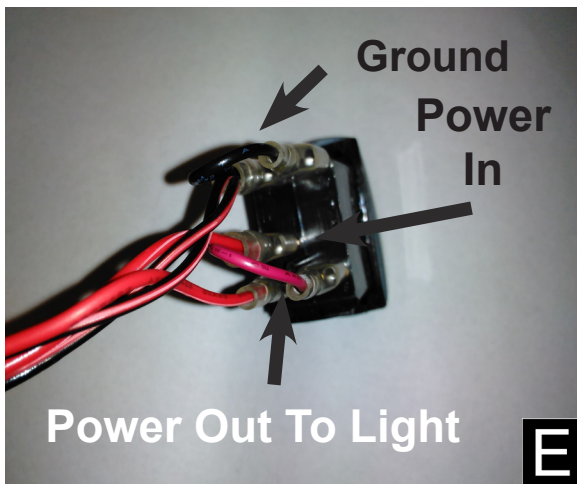

Step 4: Inspect & ensure that rocker switch is properly wired as shown on (Figure E)

Step 5: Install rocker switch, then hook up the Red Wire (+), and Black Wire (-) to the battery. Wire harness comes with a 5 Amp in-line fuse.

Note: Figure F shows the Rocker Switch properly installed.

This completes the Windshield Light installation.
