Part & Hardware List			
ITEM	QTY	Description	STEP USED
P1	1	Fixed Steering Hub	2
P2	6	M5 X 20 flat head screw	5
P3	1	3 mm Allen Wrench	5

Tools Required
15/16" Socket
Socket Wrench

**Step 1:** Place vehicle on a flat and level surface. Place gear selector in "Park" and remove keys from the ignition.

**Step 2:** Pop out center-piece of the steering hub to allow hub to be mounted onto steering shaft. Slide hub onto the shaft (**Figure A**).

**Step 3:** Place a drop of lock tight (blue) on the thread of the steering shaft nut, and tighten to factory specification using the socket wrench (**Figure B**). Insert center-piece back into steering hub.

**Step 4:** Place steering wheel onto hub, and match up the 6 bolt holes (**Figure C**).

**Step 5:** Thread on the bolts, and tighten to factory specification using the supplied allen wrench (**Figure D**).

This completes installation. Time to ride and enjoy!

**ProTip:** Periodically check all hardware and re-tighten if needed.
